# YETI<sup>TM</sup>

## SCORE<sup>®</sup> TROPHY TRUCK<sup>®</sup>

READY-TO-RUN • BRUSHLESS

1/10th SCALE ELECTRIC 4WD

 **axial**<sup>®</sup>  
[www.axialracing.com](http://www.axialracing.com)

## CAUTIONS

To prevent serious personal injury and/or property damage, operate all remotely controlled models in a responsible manner as outlined herein.

### CHOOSE THE RIGHT PLACE TO OPERATE YOUR R/C MODEL.

- Do not run on public streets or highways. This could cause serious accidents, personal injuries, and/or property damage.
- Never run R/C models near people or animals.
- To avoid injury, do not run in confined spaces.
- Do not run where loud noises can disturb others, such as hospitals and residential areas.
- Never run indoors. There is a high risk of fire and/or damage.

### INSPECT YOUR MODEL BEFORE OPERATION.

- Make sure that all screws and nuts are properly tightened. It is also a good idea to use removable thread lock wherever metal screws go into metal, especially for engine mounts.
- Always use fresh batteries for your transmitter and for your receiver to avoid losing control of the model.
- Always test the brakes and throttle before starting your engine to avoid losing control of the model.

### AFTER OPERATION OF YOUR R/C MODEL

- Turn off receiver first, then turn off transmitter, this will prevent runaways.
- Be careful when handling batteries, they will be hot after running.
- Replace any batteries that have been dented or have frayed wires, short circuits can cause fire.
- Be sure to keep your R/C model clean and free of excess dirt and grease, this will increase the life.
- Disconnect the battery from the ESC whenever the vehicle is not in use.

## VORSICHT!

Um Verletzungen an Personen und/oder Sachschäden zu vermeiden, sollten alle ferngesteuerten Modelle sorgfältig und verantwortungsbewusst bedient werden, wie nachfolgend beschrieben.

### Wählen Sie den richtigen Platz zum Fahren

- Fahren Sie niemals auf öffentlichen Straßen. Dies könnte Verkehrsunfälle, Personen schäden oder Sachschäden verursachen.
- Fahren Sie niemals in der Nähe von anderen Personen oder Tieren.
- Fahren Sie niemals auf belebten Straßen.
- Fahren Sie nie in der Nähe von Wohnhäusern oder Krankenhäusern. Der Lärm könnte andere Personen stören.
- Fahren Sie niemals in Innenräumen. Dort könnte etwas beschädigt werden.

### Überprüfen Sie Ihr Modell, bevor Sie es in Betrieb nehmen.

- Gehen Sie sicher, dass alle Schrauben und Muttern festgezogen sind. Verwenden Sie überall dort Schrauben-Sicherungslack, wo Metallschrauben in ein Metallgewinde greifen, besonders bei den Motorhaltern.
- Um Störungen zu vermeiden, benutzen Sie immer voll geladene Akkus in Ihrem Sender und Empfänger.
- Bevor Sie den Motor starten, sollten Sie immer die Funktion der Bremse und des Gashebels testen.

### Nach Betrieb des RC Modells:

- Zuerst den Empfänger abdrehen, dann den Sender abdrehen um unkontrolliertes Durchgehen zu vermeiden.
- Seien Sie vorsichtig mit gebrauchten Akkus, sie können nach dem Gebrauch heiß sein.
- Ersetzen Sie Akkus/Batterien die beschädigt sind oder schadhafte Kabel aufweisen, sie können Kurzschlüsse oder Feuer verursachen.
- Halten Sie Ihr Fahrzeug sauber und entfernen Sie Schmutz und Schmierfett, damit erhöhen Sie die Lebensdauer Ihres Modells.

## PRECAUTIONS

Afin d'éviter toutes blessures corporelles et/ou dommages environnants, veuillez procéder en toute responsabilité comme indiqué ci-dessous

### Choisir le lieu adéquat pour faire rouler votre modèle.

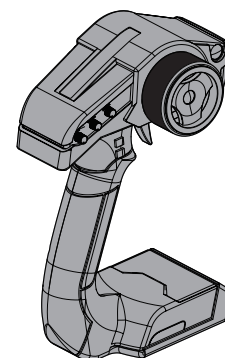

- Ne jamais rouler dans les rues ou sur les routes ouvertes au public. Ceci peut provoquer de graves accidents.
- Ne jamais rouler près de personnes ou d'animaux.
- Pour éviter les blessures, ne pas rouler dans des espaces confinés.
- Ne jamais rouler où le bruit peut déranger, comme aux abords des hôpitaux ou des quartiers résidentiels.
- Ne jamais rouler à l'intérieur: les gaz d'échappement sont nocifs.

### Contrôler votre modèle avant chaque utilisation.

- Vérifier que les vis et les écrous sont bien serrés. Il est très fortement conseillé d'utiliser du frein filet pour bloquer les vis qui sont en contact avec du métal et tout particulièrement les vis du moteur.
- Toujours utiliser des batteries bien chargées pour l'émission et la réception.
- Toujours vérifier les freins et la commande des gaz avant de démarrer.

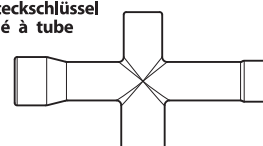

### Après l'Opération De Votre Modèle de R/C

- Le virage du récepteur premier, alors virage de l'émetteur, ceci empêchera des fugitifs.
- Faire attention en contrôlant des piles, ils auront chaud après avoir couru.
- Remplacer n'importe quelles piles qui ont été cabossées ou a éraillé des fils, les court-circuits peuvent causer le feu.
- Être sûr de garder votre modèle de R/C nettoie et libère de terre et la graisse suppléments, ceci augmentera la vie.

## Charge your battery / Laden des Fahrakkus / Chargement de la batterie

Follow the manufacturer's directions for the charger you purchased to properly charge your batteries.

Folgen Sie den Herstelleranweisungen für den Auflader Ihres gekauften ordentlich, Ihre Batterien zu laden.

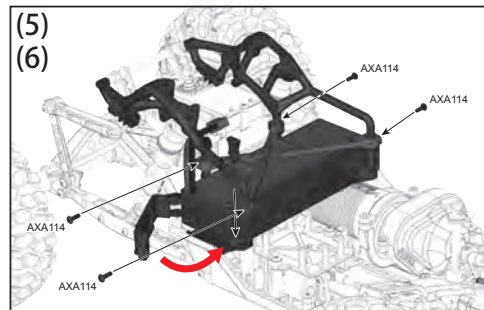

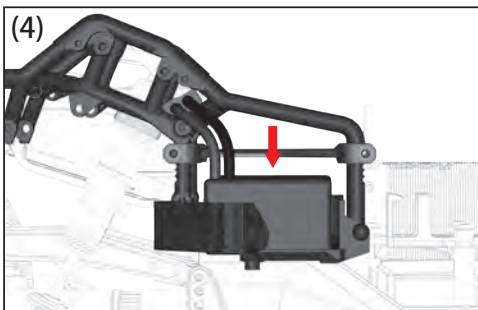

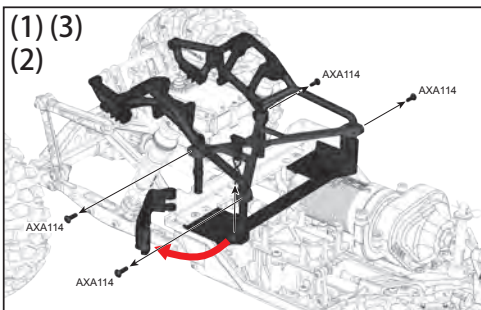

Suivre les directions de fabricant pour le chargeur votre a acheté convenablement pour charger vos piles.

**Do not use a Nickel Cadmium or Nickel Metal Hydride battery charger to charge LiPo batteries. Damage to the batteries and charger will likely occur resulting in a fire.**

**Verwenden Sie keine Nickel-Cadmium-oder Nickel-Metall-Hydrid-Akku Ladegerät LiPo-Akkus aufladen. Schäden an den Batterien und Ladegerät wird wahrscheinlich auftreten, was zu einem Brand.**

**Ne pas utiliser un chargeur de batterie au nickel-cadmium ou nickel-métal-hydrure pour recharger les batteries LiPo. Les dommages aux batteries et le chargeur se produira probablement de provoquer un incendie.**

## Battery Tray Adjustment

**1.Remove clip to open battery access door**

**4.Adjust battery clamp to fit snug against battery.**

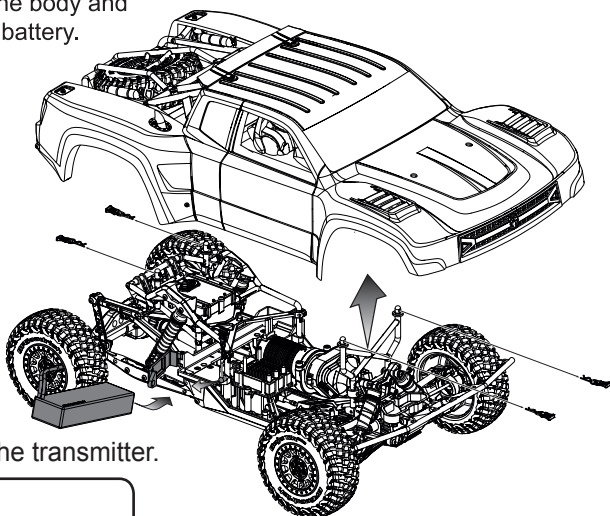

**2.Slide battery into try to check clamp height**

**5. Reinstall x4 M3x8mm screws**

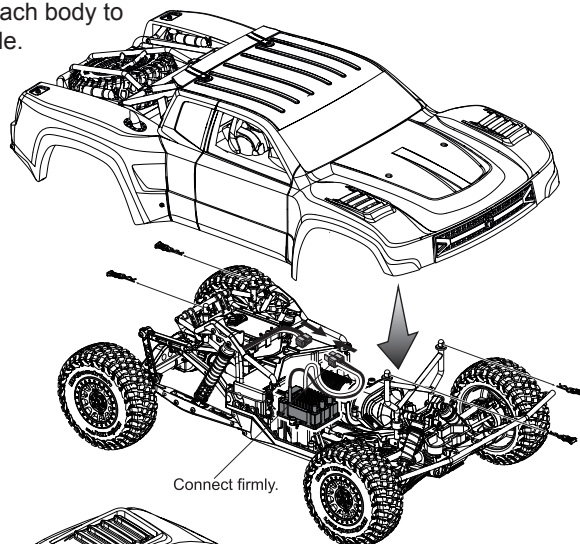

**3.Remove x4 M3x8mm AXA114 screws**

**6. Close battery access door and insert clip**

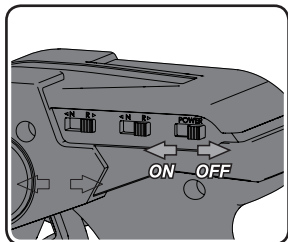

**1** Remove the body and install the battery.

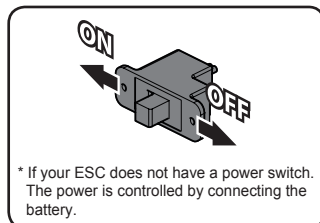

**2** Reattach body to vehicle.

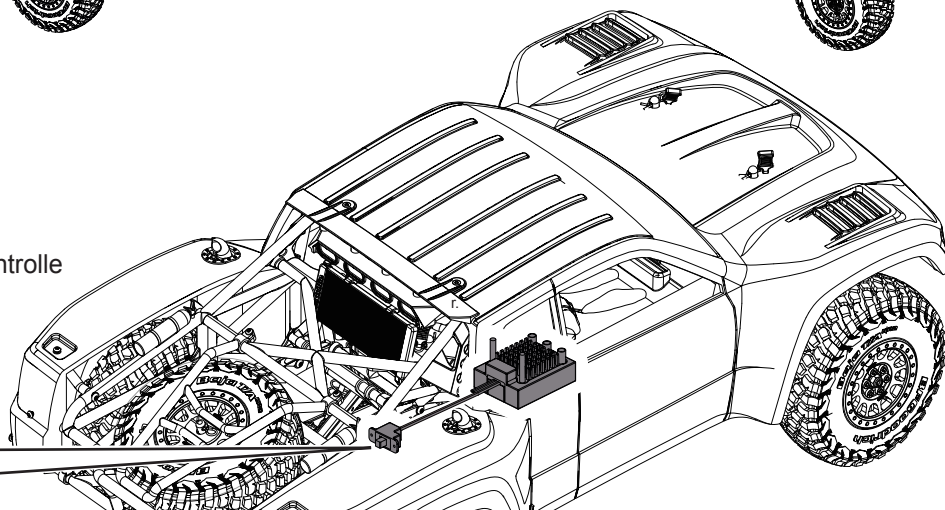

**3** Turn on the transmitter.

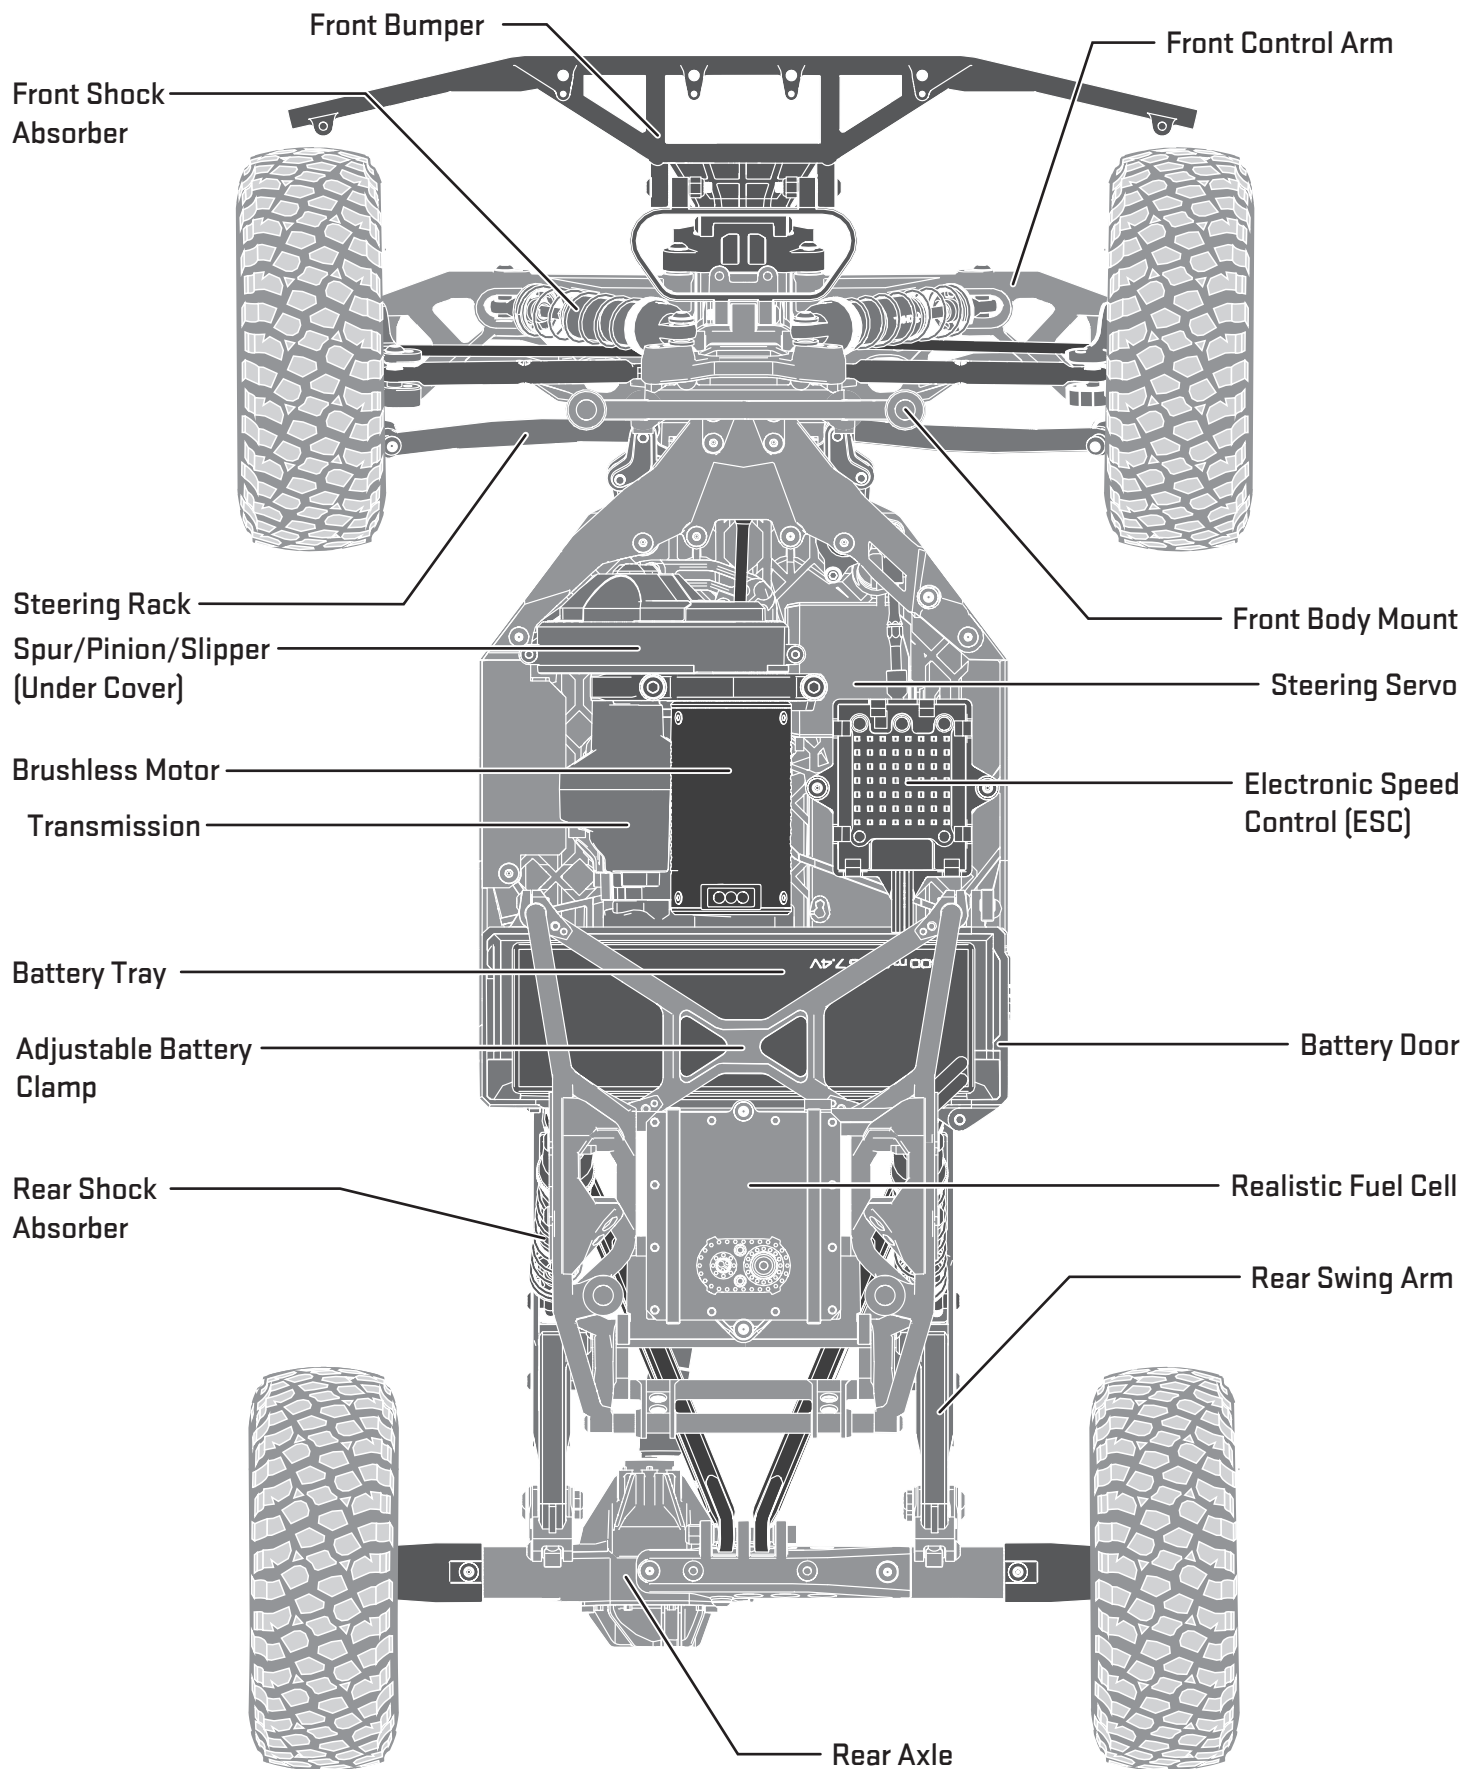

**4** Turn on the electronic speed controller

\* If your ESC does not have a power switch. The power is controlled by connecting the battery.

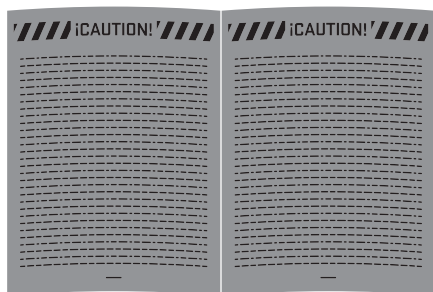

## Top View Parts

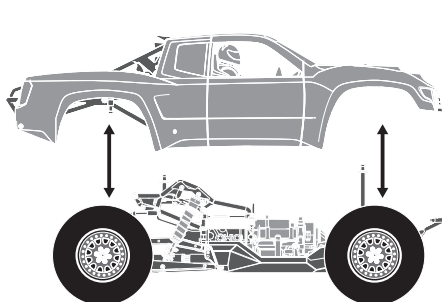

# Getting-Started Checklist

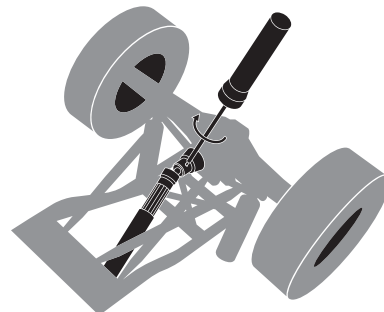

The following checklist is a guide for getting you vehicle running for the first time.

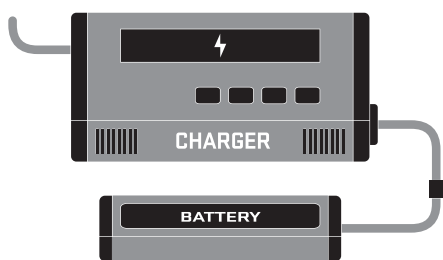

- ☐ Read 'Cautions' in Manual. (Page 2)

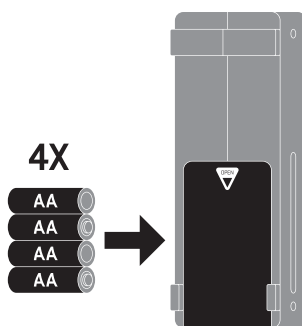

- ☐ Familiarize yourself with vehicle and its components.

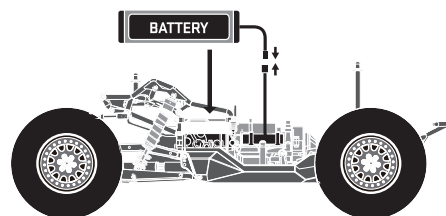

- ☐ Even though the vehicle is new check driveshaft setscrews and other screws to make sure they are tight from the factory.

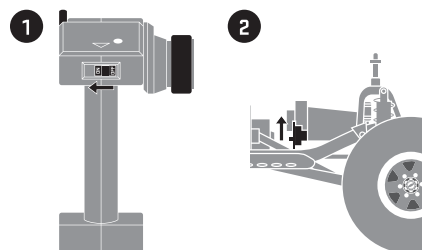

- ☐ Charge battery pack. (Page 4)

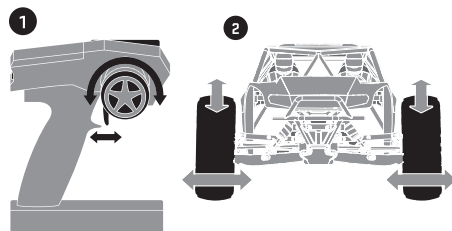

- ☐ Install 4X AA batteries into Transmitter. (Page 7)

- ☐ Install battery pack in vehicle. (Page 4)

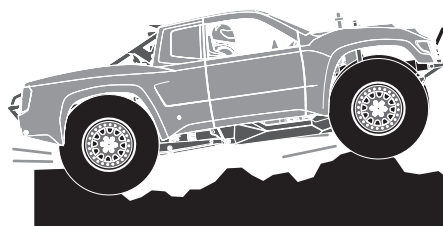

- ☐ Turn on transmitter FIRST then ESC. (Page 4)

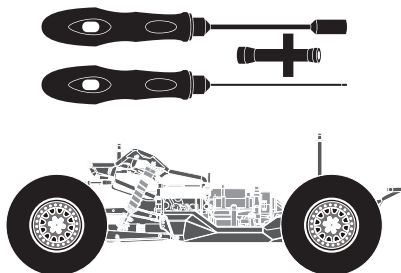

- ☐ Check to make sure steering and throttle operation work correctly. (Page 7)

- ☐ Range check radio system. (Next Page)

- ☐ Drive vehicle, challenge yourself and have fun!

- ☐ Maintain vehicle. (Next Page)

## Range-Checking Your Radio System

The radio system should be checked before operating the vehicle to ensure it's operating properly and has adequate range.

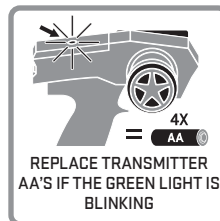

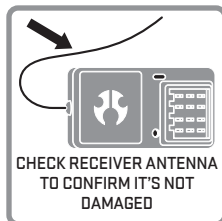

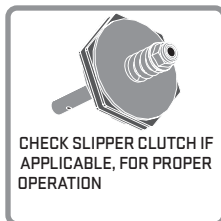

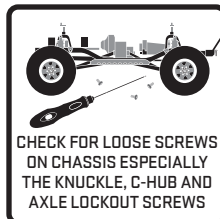

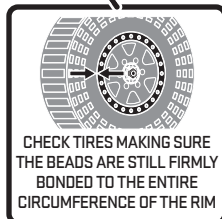

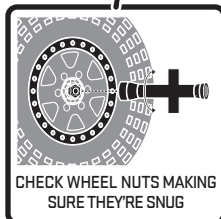

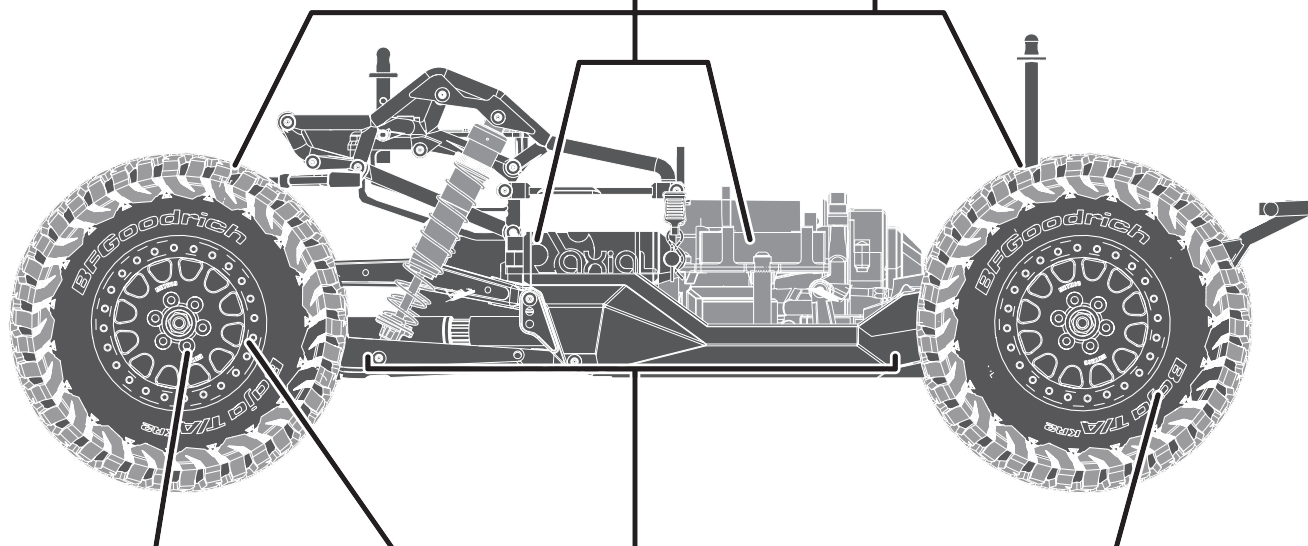

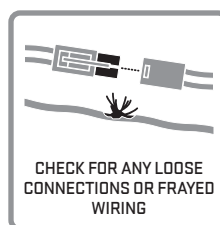

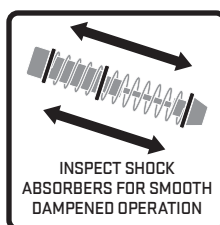

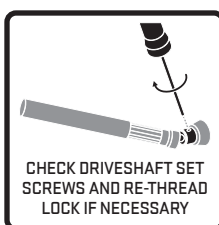

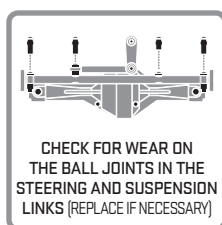

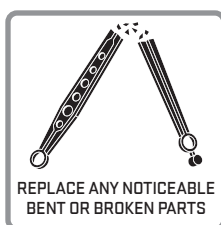

1. Turn on the transmitter first and then the vehicle.
2. Have a friend hold the vehicle while keeping hands and loose clothing away from moving parts.
3. Walk away until you are at the farthest distance you plan to operate the vehicle.
4. Steer the vehicle back and forth and throttle both forward and reverse making sure there is no erratic behavior.
5. If any erratic behavior is exhibited do not operate the vehicle, call customer service for further assistance.

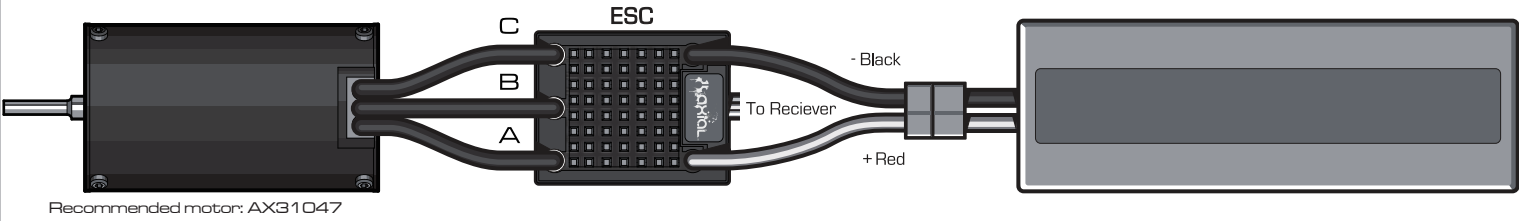

RANGE-CHECKING FOR DISTANCE

## Maintaining Your Vehicle

Just like a full size car or truck your RC vehicle must undergo periodic maintenance in order to ensure peak running performance. Preventative maintenance will also help avoid needless breakages which could result in costly repairs. Below are some suggestions to properly maintain your vehicle.

AE-3 Vanguard Forward/Reverse Brushless ESC Instruction

Brushless ESC and Motor Setup:

- Mount the ESC in an area that is well ventilated and isolated from vibration and shock.
- Connect the ESC wires to the motor: Generally A to A, B to B, and C to C.
- Plug the receiver wire into the throttle channel on the receiver.
- Before plugging the battery into the ESC, make sure your transmitter is on and the throttle trim is set to zero.
- Plug in the battery to the ESC with the ESC switch in the OFF position.
- Apply full throttle on the transmitter.
- Turn on the ESC switch while applying full throttle.
- The ESC will emit a series of beeps with the red LED.
- Continue applying full throttle until the ESC blinks green and emits a series of beeps.
- Once the ESC blinks red, apply full brake (reverse) on the transmitter.
- The ESC will emit a series of beeps while blinking red to finalize the brake/reverse endpoint.
- Return the throttle to the neutral position and the ESC will emit a series of beeps to finalize the neutral point.
- The ESC will emit a final series of beeps confirming the ESC is ready to operate.
- Apply throttle to make sure the motor is going the direction you wanted.
- To reverse the direction of the motor, switch two of the wires going to the motor.

Notes:

- If the ESC setup does not initialize when holding the full throttle, try switching the throttle reversing switch on the transmitter.
- LiPo Cut-Off is set to "ON" from the factory
- Use the CastleLink (Optional, not included) to access the advanced settings available in the ESC.
- Visit <http://www.castlecreations.com/> for more informtaion on the CastleLink USB Programming Kit.

Specifications:	
Input voltage:	3S Lipo/8 NiCELL
Size:	1.95inx1.51in
Weight:	62.3grams
On-Resistance FET:	.00055 Ohms (per phase)
BEC Voltage/A:	5.0V 2.0A Peak
PWM Frequency:	12 KHZ

**CAUTION**

CONNECT THE BATTERY PACK JUST BEFORE DRIVING AND DISCONNECT IT IMMEDIATELY AFTER.

ALWAYS MAKE SURE YOU ARE CONNECTING THE ESC TO A PROPER POWER SOURCE THAT HAS THE CORRECT VOLTAGE & POLARITY. INCORRECT VOLTAGES OR REVERSED POLARITY WILL DAMAGE THE ESC.

ONCE THE BATTERY PACK IS CONNECTED, HANDLE THE MODEL WITH EXTREME CARE, MAKE SURE YOU ARE CLEAR OF ALL ROTATING PARTS.

## Gear Ratio / Getriebeübersetzung

Use this equation to calculate the final drive ratio.  
**Final Drive Gear Ratio = (Spur/Pinion)x5.67**

Mit dieser Gleichung können Sie die Gesamtübersetzung berechnen.

**Gesamtübersetzung = (Spur/Pinion)x5.67**

**Slower - More Torque**  
**Langsamer - Mehr Kraft**

**Faster - Less Torque**  
**Schneller - Weniger Kraft**

## Warranty Info

### AXIAL LIMITED WARRANTY

Your Axial product is warranted to be free of defects in materials and workmanship when new in the factory sealed box. This warranty does not cover damages due to normal wear and tear, users' failure to perform routine maintenance, error of assembly or installation, modifications or addition of aftermarket parts or option parts. This warranty lasts as long as the original purchaser owns the product and is not transferable (verified by dated itemized sales receipt accompanied with product). In the event of a defect under this warranty, Axial will, at our discretion, repair or replace the product, provided our inspection indicates that an original defect exists. Axial provides a 10-day warranty from the date of purchase on electronics (i.e. servo, esc, radio). Axial reserves the right to replace any product which is no longer available with a product of comparable value and function. If Axial determines the repair is not covered under warranty guidelines, there could be a charge applied for the repair and return shipping charges. Note: Purchasing products from unauthorized distributors may void warranty and prevent support and service.

### INTERNATIONAL CUSTOMER WARRANTY

Please return product to the dealer where the purchase was made. If your Axial product purchase was made through an on-line retailer, any warranty issues must be taken care of by that retailer. Axial assumes no responsibility for Axial products sold internationally by on-line retailers.

### REPAIR

For warranty repair, please contact Axial Customer Service at (877) 64-AXIAL (877-642-9425).

### HOURS AVAILABLE:

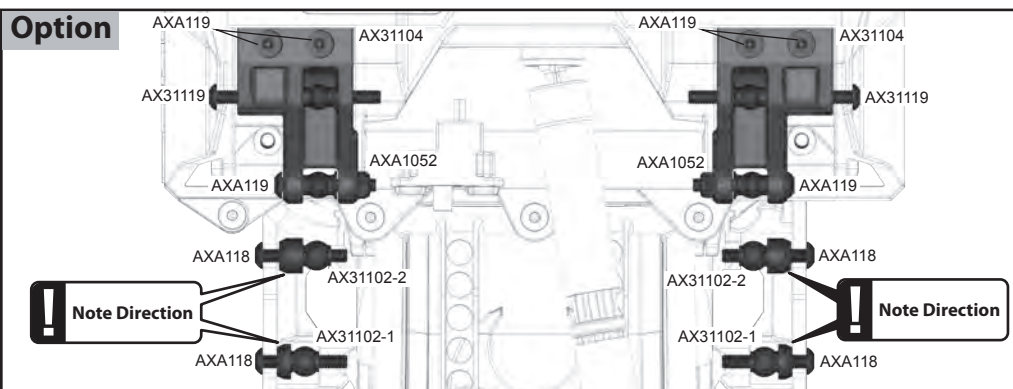

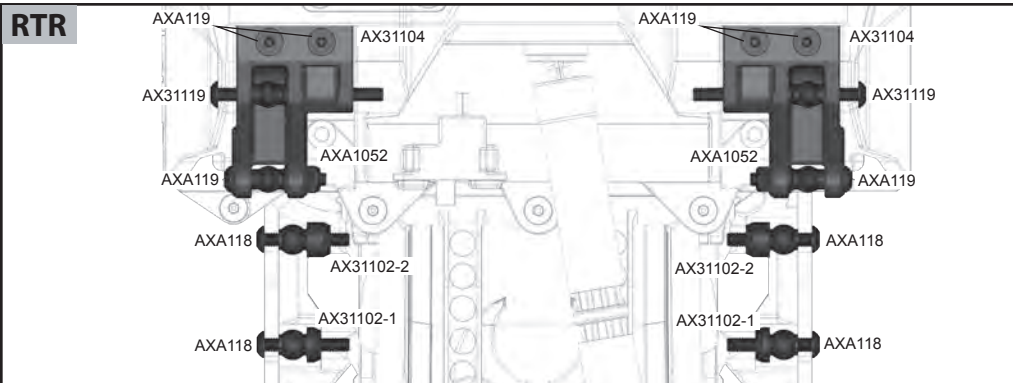

8:00 am - 5:00 pm Monday through Friday, Central Time.

## Rear Suspension Tuning Upper Link Adjustments

•AX31104 Mounts can be installed on either side of the AX31103 Chassis Tub

•Swapping the AX31104 mounts will provide a suspension more suited to low speed technical terrain. This also requires flipping the upper shock bushings. The RTR stock setup is more suited for high speed stability.

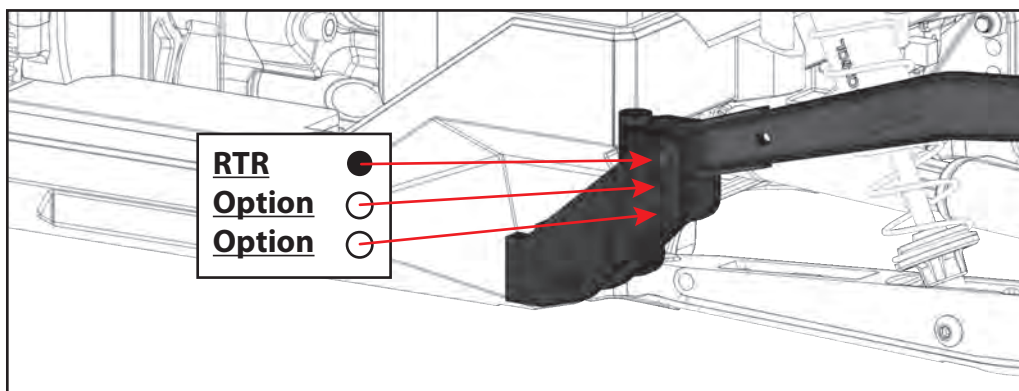

•Upper Shock bushings rotated to relocate shocks and line up with AX31109 Lower Links.

•Moving the upper links at the chassis will change the anti-squat characteristics of the Yeti under power.

•RTR Stock: Upper hole, more Anti-Squat for more rear traction under power.

•Optional lower holes, less Anti-Squat for less rear traction under power.

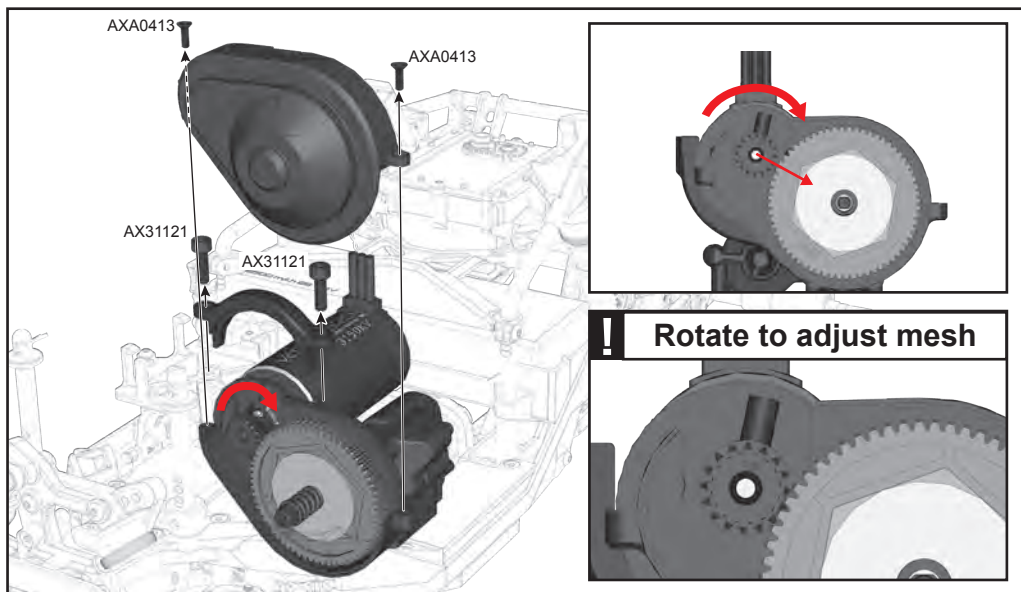

## Gear Mesh Adjustment

•Remove X2 M2.6x8mm AXA0413 Flatheads from AX31107 Spur Cover to gain access to spur and pinion

•Loosen X2 M4x12mm AX31121 Capheads from AX31106 Motor Mount Clamp

•Rotate the motor and motor mount assembly to fine tune gear mesh

# SCX10

## THE OFFICIAL TRUCK OF THE R.E.C.O.N. G6 CHALLENGE™

AWCC 2011

### SCX10™ FEATURES:

- > SCALE LOOKS WITH METAL TO MATCH!!!
- > TRUE STEEL C-CHANNEL FRAME
- > SOLID AXLE DESIGN WITH HARDENED STEEL INNER AXLES FRONT AND BACK
- > TRUE RING AND PINION MECHANICAL DIFFERENTIALS
- > COIL OVER SHOCKS
- > STRONG 4X4 TRANSMISSION / TRANSFER CASE ALL-IN-ONE
- > FULL METAL BEARINGS IN AXLES AND TRANSMISSION - RUBBER SEALED FOR MAXIMUM PROTECTION

If you are looking for adventure, the RECON G6 Challenge™ is where it's at. RECON G6 Challenge™ events deliver excitement and push boundaries; always bringing the elements of what a real adventure should deliver - the unknown!

The coolest thing about participating in the G6 Challenge™ is that it is not about the podium, it's all about the finish. It's about the massive amount of drive time and persevering to survive the unknown-uncatched; and then sharing stories at the end of the day - "How in the heck did you clear TM-24 on the 100-course?" "Did you see that Bender-6X walk-it?!" "Did you get passed by the Swanson Swagger!?"

For adventure G6'ers, the rougher and less traveled, the better! It is the adventure of a lifetime for man and scale machine against the elements. The G6 is about battling the course with your comrades, work as an individual or help your fellow G6'ers to overcome the obstacles; survival is the name of the game!

In an adventure, chasing the unknown requires confidence. Confidence = reliability = SCX10™. The Axial SCX10™ - the official truck of the RECON G6 Challenge™!

Visit our blog and start the adventure!
